

Customer Support & Operations Specialist

Clearpath SaaS Technologies | Hyderabad, India (Hybrid) | Experience: 2-4 years

About the Role

We're hiring a Customer Support & Operations Specialist to help deliver a great customer experience across chat, email, and phone support. You'll own ticket resolution, SLA compliance, and drive process improvements across the support function.

Responsibilities

- Handle and resolve customer queries across chat, email, and phone within SLA
- Monitor and report on CSAT, NPS, and ticket resolution metrics
- Identify recurring issues and work with product teams to drive fixes
- Maintain and improve the internal knowledge base and support documentation
- Coordinate with logistics, product, and billing teams on escalated issues
- Support onboarding and training of new support team members
- Contribute to process improvements that reduce resolution time

Required Skills

- Experience with helpdesk tools such as Zendesk or Freshdesk
- Strong written and verbal communication skills
- Ability to manage a high volume of tickets while maintaining quality
- Comfort working with SLA targets and performance metrics
- Basic proficiency with Excel for reporting and analysis

Nice to Have

- Experience in a SaaS or e-commerce support environment
- Basic SQL knowledge for pulling support data
- Six Sigma or process improvement certification
- Prior experience leading or mentoring a small support team

What We Offer

- Competitive salary with shift and performance allowances
- Flexible hybrid work model
- Learning and development budget
- Health insurance for you and your family
